Art Unit: : 3736

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 15-20, 45-50, 56-85, 115-123 and 125-128 drawn to an apparatus for collecting a biological sample, classified in class 600, subclass 576.

II. Claims 21-25, 51-55, 86-91, 95-114 and 129-138, drawn to an analyzer disk assembly, classified in class 600, subclass 584.

III. Claims 26-31, 37, 40-44, 92-94 and 124, drawn to a method for transferring a sample, classified in class 600, subclass 584.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because patentability may reside in the overall combination. The subcombination has separate utility such as an apparatus for collecting a sample without transfer to an analyzer disk.

3. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method or process can be practiced by another materially different apparatus not using such a cassette or disk.

Art Unit: : 3736

4. Because these inventions are distinct for the reasons given above and the search required for Group II and III is not required for Group I, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Hindenburg whose telephone number is (703)308-3130
